

DxO FilmPack v2.0 – Release Notes

Windows

Supported Systems

- Windows XP (32 and 64 bits)
- Windows Vista (32 and 64 bits)

Installation

- DxO FilmPack 2 installer installs an application and a plug-in for Adobe Photoshop (if Adobe Photoshop exists on the machine).
- If DxO FilmPack 1.x is already installed, DxO FilmPack 2 installer will not uninstall it. It is not needed to uninstall DxO FilmPack 1 to run DxO FilmPack 2.
- DxO FilmPack 2 functionalities of DxO Optics Pro are available with DxO Optics Pro 5.3.1 and are installed by DxO Optics Pro 5.3.1 installer.

New features

- 27 new film renderings (color and grain) have been added
- 8 color filter have been added
- A new slider allows to set the color rendering intensity
- GUI has been improved
 - Choosing a grain is easier
 - Setting contrast and saturation is more precise
 - Different zoom level are now available in the Adobe Photoshop plug-in

Third party software compatibility

- Adobe Photoshop plug-in is compatible with Adobe Photoshop CS2, CS3 and CS4 and Adobe Photoshop Elements 4, 5, 6 and 7

Known limitations

- Images without Exif are properly processed by DxO FilmPack 2 but appear as a single pixel with the Windows Explorer Filmstrip display mode. Other applications (such as Adobe Photoshop, FastStone or Irfanview) open these images properly.

Known bugs

- While using the Photoshop plug-in, if you are displaying a picture with a zoom above 100%, a Photoshop crash may occur. If this happens, it is advised that you not use a zoom factor greater than 100%.
- When in "Classic mode" theme under Windows XP, group titles are crossed out in the parameter window.

Macintosh (build 226)

Supported Systems

- Mac OS X.4 (Tiger)
- Mac OS X.5 (Leopard)

Installation

- DxO FilmPack 2 installer installs an application and a plug-in for Adobe Photoshop (if Adobe Photoshop exists on the machine).
- If DxO FilmPack 1.x is already installed, DxO FilmPack 2 installer will not uninstall it. It is not needed to uninstall DxO FilmPack 1 to run DxO FilmPack 2.
- DxO FilmPack 2 functionalities of DxO Optics Pro are available with DxO Optics Pro 5.3.1 and are installed by DxO Optics Pro 5.3.1 installer.

New features

- 27 new film renderings (color and grain) have been added
- 8 color filter have been added
- A new slider allows to set the color rendering intensity
- GUI has been improved
 - Choosing a grain is easier
 - Setting contrast and saturation is more precise
 - Different zoom level are now available in the Adobe Photoshop plug-in

Third party software compatibility

- Adobe Photoshop plug-in is compatible with Adobe Photoshop CS2, CS3 and CS4 and Adobe Photoshop Elements 4, 5 and 6.

Bug fixes over FilmPack 2.0 build 219

- Standalone version: settings are now maintained from one image to the other
