

PRESS RELEASE

UNDER EMBARGO UNTIL OCTOBER 5TH, 2022

DxO ViewPoint 4, the software that fixes geometry and perspective, introduces the powerful new ReShape tool to help perfect any shot

DxO ViewPoint 4, the software that gives photographers ultimate control over perspective, geometry, and image quality, gains a host of new tools and updates, including the innovative ReShape tool for local adjustments, improved cropping and rotation, new guides for perfect alignment, an easier-to-use interface, and full Apple Silicon support.

Paris (France): DxO Labs, one of the most innovative companies in photo editing software, today announces the immediate availability of DxO ViewPoint 4, the unique and powerful software for perfect geometry and perspective. Thanks to ViewPoint 4's tools, photographers can fix imperfections in framing, defeat optical flaws, and rebalance subjects like never before.

The latest version — available as standalone software, a palette within DxO PhotoLab, or as a plug-in for Adobe Photoshop®, Photoshop Elements®, and Lightroom Classic® — features the new ReShape tool that allows users to warp specific regions of an image, improvements to its crop and rotation functionality, the addition of guides to ensure the most precise adjustments, an updated interface for a more refined user experience, and full support for Apple Silicon machines.

Perfect every last detail with the new ReShape tool

Headlining DxO ViewPoint 4 is the new ReShape tool, a powerful feature that eclipses rival software in its ability to warp and repair individual parts of a scene. It is now possible to realign nagging details like crooked architecture and broken patterns so that images have greater impact and improved balance. The ReShape tool's customizable grid and extensive control points ensure precise manipulation, and adjustments are quick and intuitive.

Fabrizio Dei Tos, Product Manager at DxO, explains: "We created ViewPoint 4 as the next step in DxO's continued pursuit of optical and imaging perfection. The ReShape tool is the best solution out there for warping local details, and provides a truly powerful solution for photographers. ViewPoint 4's other upgrades expand and refine its usability, so whether you're perfecting architectural images, ensuring distortion-free landscapes, or improving group portraits, this is the software you need."

Smarter and easier ways to improve your photos

Other upgrades include the ability to swiftly flip and mirror images, enhanced integration between the Crop and Horizon tools for quick and easy adjustments, the option to add guides for more accurate adjustments to vertical and horizontal lines, and a redesigned toolbar for a better user experience.

Price and availability

DxO ViewPoint 4 (Windows and macOS) is available to purchase now from the DxO website (<https://shop.dxo.com/en>) for \$ 99

Owners of DxO ViewPoint 3 can upgrade for \$ 59. To upgrade, customers should log into their customer account at https://shop.dxo.com/login_upgrade.php/en.

A license for DxO ViewPoint 4 does not require a subscription.

A full one-month trial of DxO ViewPoint 4 is available from the DxO website: <https://www.dxo.com/en/dxo-viewpoint/>.

About DxO ViewPoint 4

DxO ViewPoint 4 is software designed to automatically straighten distorted perspectives, correcting defects introduced by lenses and the position of the photographer. Alongside an array of perspective tools, it features DxO's renowned Optics Modules which correct lens flaws such as distortion and chromatic aberrations. In addition, in one click, it can restore the natural shapes of subjects located at the edge of images that have been stretched by a wide-angle lens. It also has a Miniature Effect tool that produces a super-shallow depth of field featuring smooth bokeh, similar to that produced by a tilt-shift lens.

DxO ViewPoint is designed for Mac and Windows computers as an independent application, as a palette within DxO PhotoLab, and as a plug-in for Adobe Photoshop®, Adobe Lightroom Classic®, and Adobe Photoshop Elements®.

About DxO

DxO is one of the most innovative companies in the field of photography and image processing, creating the most powerful and versatile software on the market for both expert photographers and hobbyists. As well as DxO ViewPoint 4, it publishes DxO PhotoLab, a complete RAW processing software that won the EISA 2020-2021 award for Best Photo Software and, for the third year in succession, the 2022 TIPA award for Best Imaging Software Expert.
