

PRESS RELEASE

June 15th, 2022

Nik Collection 5: Major upgrades to Color Efex and Analog Efex, improved local adjustment technology, and a smoother user experience

The latest version of the renowned suite of eight plug-ins for Adobe Photoshop® and Lightroom Classic® also features a brand new tool to reduce haze and 29 faithfully reproduced color film grains.

Powerful and diverse, the eight plug-ins of Nik Collection 5 also function as standalone apps and offer unlimited creative potential. More than 300 presets give instant results, while intuitive sliders and DxO's exclusive U-Point technology for local adjustments bring endless creative opportunities and the ability to refine every detail.

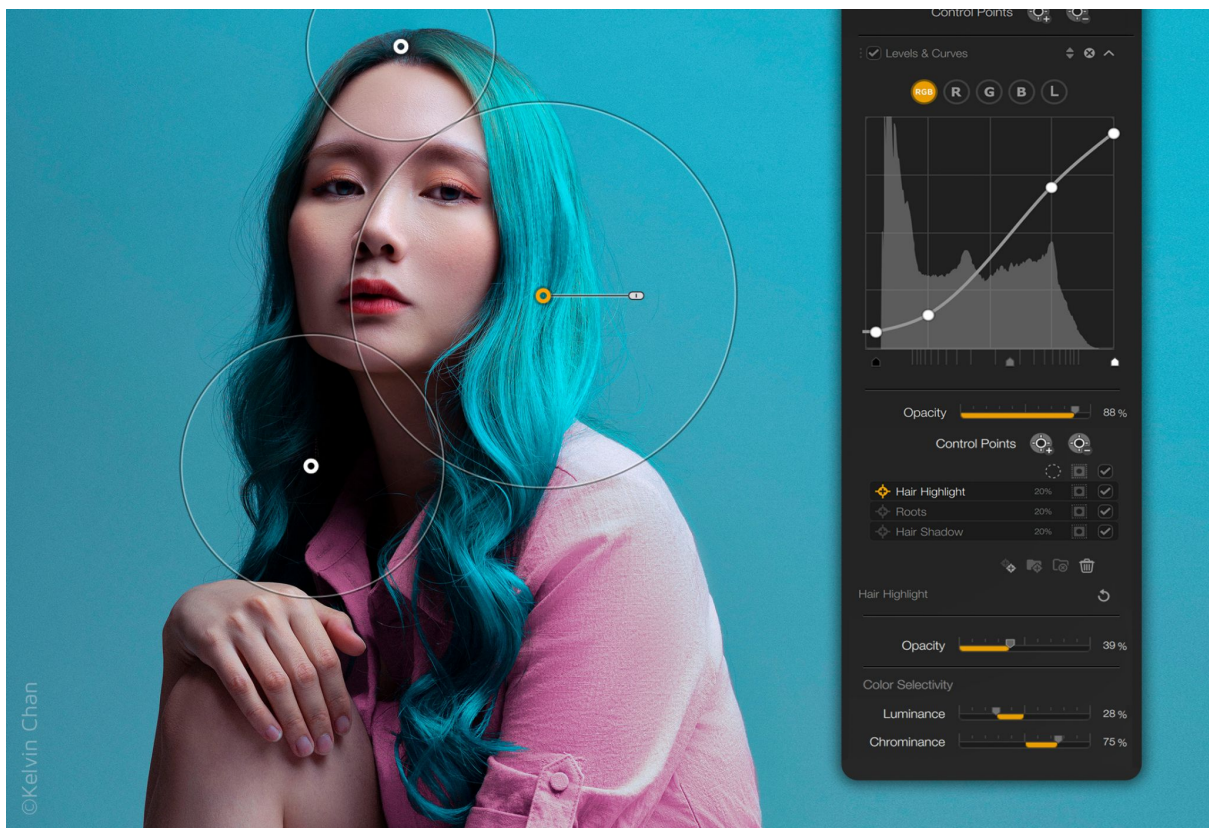

Revamped user interface for a more refined editing experience

The user interfaces of Nik Color Efex and Nik Analog Efex have been rebuilt from the ground up, bringing them into line with the recently updated Nik Silver Efex and Nik Viveza. Nik Color Efex is a powerful means of enhancing and manipulating color and continues to be Nik Collection users' most popular plug-in, while Nik Analog Efex is unique in its potential to recreate vintage photographic effects. Thanks to the newly refined and functional user experience in both of these plug-ins, presets are now more accessible with improved options for saving and editing favorite settings.

Local adjustments just got even smarter thanks to U Point™ technology

U Point™ technology, the pioneering local adjustment tools that make targeted changes feel intuitive and efficient without using masks, continues to evolve in Nik Color Efex and Nik Analog Efex. Control Points can now be renamed, making them easier to manage, and users can also save them as part of a preset, speeding up workflows. The addition of two Color Selectivity sliders — Luminance and Chrominance — gives users greater control

over the impact of local adjustments, and the interface has been updated so that creating and editing a Control Point is a clean and distraction-free experience.

Two more major boosts to Color Efex: ClearView technology to remove haze and 29 authentic color film grains

Haze in photographs is simple to remove when using Nik Color Efex thanks to the addition of ClearView, technology borrowed from DxO PhotoLab 5. Fog, mist, smoke, and pollution are intelligently reduced using a simple slider, returning contrast and color to photographs. Color Efex also benefits from 29 new, authentic color film grains created in DxO's purpose-built laboratories, giving analog era enthusiasts a host of new creative options.

Nik Perspective Efex adds more than 4,300 new camera and lens combinations

Nik Perspective Efex benefits from the ongoing research conducted in DxO's exclusive labs with more than 20 new cameras and 60 lenses added to its database of supported equipment. The plug-in can now automatically correct the geometric distortions of more than 70,000 camera and lens combinations.

DxO PhotoLab 5 ESSENTIAL joins the party

Those shooting RAW get to experience the power of DxO PhotoLab 5 ESSENTIAL, the feature-rich photo-editing software that contains DxO's renowned Optics Modules and U Point™ technology for precise local adjustments.

About Nik Collection

First created more than 25 years ago, Nik Collection is a suite of eight innovative plug-ins, each quickly launched from within Adobe Photoshop®, Adobe Lightroom Classic®, or DxO PhotoLab, or as standalone software. Plug-ins are packed full of innovative filters, tools, and presets that give photographers endless creative potential. The latest updates build on the success of Nik Collection 4 which brought interface improvements and the option to save local adjustments using U Point™ technology as part of presets. It also introduced Meta Presets which allow users to combine changes from multiple plug-ins and apply them to an image in Adobe Photoshop® with a single click, and fresh functionality in Adobe Lightroom® to copy and paste settings and quickly apply recent edits for a smoother workflow.

Price and availability

Nik Collection 5 (Windows and macOS) is now available for download on the DxO website (<https://shop.dxo.com/>) for \$ 149.

Photographers who already own Nik Collection 4 can upgrade their software by signing into their customer accounts for \$ 79.

A fully functional, one-month trial version of Nik Collection 5 is available on the DxO website: <https://nikcollection.dxo.com/download/>.

About DxO

DxO is one of the most innovative companies in the field of photography and image processing. It creates the most powerful and versatile software on the market for both expert photographers and hobbyists. It publishes DxO PureRAW, preprocessing and noise reduction software that optimizes RAW files for improved image quality, software that was recently awarded Specialist Software of the Year 2022 by Amateur Photographer magazine. DxO also produces DxO PhotoLab which won the EISA 2020-2021 award for Best Photo Software and the 2022 TIPA award for Best Imaging Software Expert.
